

Architectural Cable

End Posts need to be able to support 350lbs per the number of cables.

Space cables at 3 inches on center to meet 4 inch sphere test.

Max stanchion span: 4 feet.

Max run per turnbuckle: 50 feet.

Min hole size to pass stud through stanchion: $\frac{1}{8}$ " & $\frac{3}{16}$ " cable - $\frac{3}{8}$ " hole
 $\frac{1}{4}$ " cable - $\frac{1}{2}$ " hole

Use fittings at each end with an adjustable threaded stud or turnbuckle.

**The cable runs shown are only a small sample of what is available.
